HOTLIST

Ken Goldberg

Ken Goldberg, an artist and associate professor of engineering at the University of California, Berkeley, edited the essay collection *The Robot in the Garden: Telerobotics and Telepistemology in the Age of the Internet* (MIT Press, 2000).

LIKE BREAD, data is freshest the moment it's made. Though the Internet can deliver information at nearly the speed of light, most of its data has been stored in memory for days or weeks. We accept the short shelf life of data like news, sports scores, and stock quotes, but there is one category of online data—the Web-camera image—that is made fresh on request.
