MS Access Quiz 3

Quiz 3:

a) Build 3 tables for a Car Company (choose your own name), including Customer, VehicleInstance, and Dealership. For each table, create the following fields:

   I. Customer: <u>CustomerID</u>, CustomerName, City, Discount
   II. VehicleInstance: <u>VehicleID</u>, VehicleName, Price, Discount
   III. Dealership: <u>DealerID</u>, DealerName, City, Commission

   (Make sure the CustomerID, VehicleID, and DealerID are the primary keys and are of data type Autonumber and are required. Make sure Price is of data type currency.)

b) Enter as many tuples/rows of data for the 'VehicleInstance' table as you like (>10 instances) and 10 tuples/rows of data for the 'Customer', and 'Dealership' tables.

c) Be sure to save your **car.mdb** file in your directory for use in subsequent labs.

Further instructions:

For the quiz, please provide:
- screenshot for ALL available tables for (a) → in the car:database window
- screenshots for ALL records in each table for (b) → try to fit it in a page

To do a **screenshot capture**, open the window which you want to capture, maximize it (or size it appropriately) and the do **Alt+Print Screen**. Then just do a **Paste** command in your word processing software to import the image into your document.
